

Flame Retardant

Re-Usable Face Mask Nomex® Nano Flex, 3-layer

Based on the experience we have gained in manufacturing hoods to protect firemen from breathing in nanoparticles, we have made a face mask including a NOMEX® Nano Flex layer. Using this layer we achieve a much higher barrier against the penetration of particles and droplets than many commonly used face masks.

Style number : 10002-60550
Size: One Size

Properties:

- 3-layers: Inner and outerlayer made from 100% NOMEX(R) Comfort with antibacterial finish based on Silverttechnology.
- Middle layer from Nomex® Nano Flex fabric that filters the smallest particles
- Prevents droplets of bodily fluids that may contain viruses from escaping via the nose and mouth
- With nose clip for better fit
- Light and comfortable to wear
- Washable up to 90°
- Öko-Tex Standard 100 and REACH

IMPORTANT!

These facemasks are not certified.
The products are non-returnable due to hygiene and quality reasons.

Composition Outershell:

100% Nomex® Comfort: 93% Meta-Aramid 5% Para-Aramid 2% P140 Antistatik

Filter:

Nomex® NanoFlex, 100% Polyimid
