**Objective**

Neutral comparison with respect to softening performance, absorbency, easy ironing properties and material maintenance and other relevant properties

**The test is particularly well-suited for**

- Fabric softeners
- Conditioners
- Fabric softening sheets for the dryer

**Description**

In comparative tests the provided products are tested together with a reference product. If available, the latest norms and standards are applied. The results of the evaluation are displayed in tables and assessed in a test report.

The following properties can be tested:

- Evaluation of softness/hand by absolute and relative assessment
- Drying power/absorbency
- Fragrance intensity
- Easy ironing
- Color maintenance and surface maintenance
- Legibility and clarity of the package information
Advantages for you as the customer

- Neutral and objective comparison of performance
- Confirmation of special product claims
- Performance of tender tests
- Support during product development
- Quality control

Requirements for test samples

**General:**
- Marketable samples and dosage instruction for the desired testing conditions.

**Amount of material:**
- Depends on testing volume, usually 1 bottle is sufficient

**Duration of testing:**
- Depends on testing volume.
